PROFESSIONAL SUMMARY

A goal-oriented React Developer with extensive knowledge of HTML, CSS, JavaScript, React, Tailwind and CSS3/SCSS seeking to use technical proficiency and creativity to develop engaging user experiences and advance in a professional career. I have accomplished numerous fruitful endeavors both as part of a team and independently. I highly value my abilities to communicate and collaborate effectively, and I am deeply enthusiastic about resolving challenges and fostering innovation. I have a track record of quickly learning and mastering new programming languages, and I pay close attention to detail and quality assurance. I enjoy working in both team and self-directed settings, and I have collaborated with others on various projects.

CORE SKILLS

- HTML 5
- Java Script
- GatsbyJS
- Version Control (Git/Github)
- ReactJS
- Firebase
- Material UI
- CSS3/SCSS
- Tailwind
- REST API
- Cross browser compatibility
- Wordpress
- Git/Github
- Analytical thinking
- Initiative and Proactivity
- Adaptability and Flexibility
- Communication and Collaboration
- Time Management and prioritization

PROJECTS

Front-end Developer

Chat Bot *Project*

May 2023 – present

- Implemented custom chatbot solutions by integrating the ChatGPT API.
- Developed an interactive layout using React to generate an improved user experience and ensure high quality design and cross-browser compatibility.
- Actively participated in back-end development tasks and successfully integrated front-end application with back-end services.
- Spearheaded debugging efforts to eliminate cross-browser issues, helped improve application functionality, and increased performance by optimizing page elements for faster loading times.

Front-end Developer

Trip Buddy *Remote*

Jun 2022– Jul 2022

- Developed a website layout using HTML and JavaScript and completed the project in slightly under a month.
- Deployed A/B testing to identify potential website improvements, as a result, implemented new features that boosted organic web traffic by over 25%.
- Integrated ReactJS, SCSS and version control techniques to improve the mobile user experience for both mobile and web view.
- Collaborated with other web developers to implement user authentication and verification for the website using NodeJS, ReactJS.

EDUCATION

- **Future Academy Africa**, *Front-end Development*
- **Free CodeCamp**

In view

April 2022
